Paul:

I just had to take a minute to say THANKS. We have worked together on other marketing systems over the past 10 years with moderate success. The two new websites that you have prepared for us with the Pay-Per-Click are fantastic. In the first four months of website operation, we have taken on more new accounts than we have in total for the past two years and with significantly higher dollar sales. Exporting to Europe was non-existent. We now claim to be an international exporter.

I must admit that with our past experience, I only hoped for more moderate results. I looked at your projections with a jaundiced eye. Our 45 year history showed a consistent sales growth but not the steep climb that you indicated. You made me a believer.

The success we have experienced has prompted me to request that you prepare a third website solely dedicated to our intellectual products and services. If past performance is any indication of success, I may have to buy a wheelbarrow to make our deposits at the bank.

Thanks again for being persistent and providing us a tremendous new avenue for sales.

Sincerely,

A handwritten signature in cursive script that reads "Dr. Philip R. Austin, P.E.".
