

October 12, 2017

Our company has had numerous web sites, web designers, SEOs, over the past 10 years; all with no luck. We were not getting leads, calls, or hits. One web developer told us "we will be getting so many leads from our site you'll have to shut it down."

One of our business partners mentioned the activity their company gets from their website and referred us to Target Marketing Solutions. We contacted them, set up a meeting, and their developers evaluated our site. They found many areas where the site was deficient. We signed the contract with Target and they got to work. The transition was effortless. Their writers were top notch and our rep was in constant communication. Within a month we were live.

We are now seeing amazing results! Many hits, leads, and phone calls. Our website is finally coded properly and we are seeing the results of Target's experience and knowledge.

We would not hesitate to refer companies to Target Marketing Solutions.

Electrex Industrial Solutions / Rexcon Controls and Automation are one happy customer.
